VOLUNTEER COMPANION PROGRAM

Many patients cannot have their families joining them around the clock, so these volunteers donate at least eight hours of their time weekly to provide much-needed companionship.

Companions work alongside our professional healthcare teams and give compassionate and attentive care to ensure the patient's safety and comfort and to assist in their feeding.

If you would like to have a meaningful experience interacting with our patients or are exploring a potential career in healthcare, this program may be the right fit for you!

Please contact the Department of Volunteer and Student Services at
(718) 283-3980.

We are looking forward to a mutually rewarding experience!
