2ND ANNUAL MAIMONIDES HEALTH MATERNAL & NEONATAL MORBIDITY REDUCTION SYMPOSIUM

LEARNING OBJECTIVES

At the conclusion of this activity, participants should be able to:

- Demonstrate enhanced knowledge and awareness of the latest evidence-based practices and research in maternal and neonatal morbidity reduction, focusing on improving health outcomes for mothers and newborns.
- Collaborate with interdisciplinary teams, sharing insights and strategies to effectively reduce maternal and neonatal morbidity through a collective approach.
- Identify and implement strategies to address health disparities and promote equity in maternal and neonatal healthcare, including eliminating race-based algorithms in clinical decision-making.
- Apply innovative approaches such as telehealth, lifestyle medicine, and family-centered cesarean births to improve care delivery and reduce morbidity rates.
- Incorporate best practices, including optimizing breast milk access for preterm infants and leveraging data from Vermont Oxford, to drive clinical improvements in their respective institutions.
- Develop and strengthen post partum interventions that support maternal and neonatal health and enhance long term wellness , such as the PEARL Program and the Brooklyn Parenting Center.
